

## pH, ORP & ISE Product Line Overview

### Immersion pH/ORP Sensors

Rugged line of 3/4"-3/4" & 3/4"-1" MNPT pH & ORP sensors for in-line and standpipe applications. Available for slurry/viscous, sulfide, high-temperature, cyanide, organic applications and more....

### Ion Selective Sensors

**Most complete line of industrial quality ion selective sensors.** Available in immersion and twist lock configurations. Custom buffer & calibrating solutions and pre-programmed instrumentation available.

### Instrumentation

Explosion-proof & programmable instrumentation for single and dual channel **pH, ORP and ISE** measurements. Optional PID & TPC, HART & Fieldbus digital outputs, multiple analog 4-20 mA outputs.

### Twist Lock pH/ORP Sensors

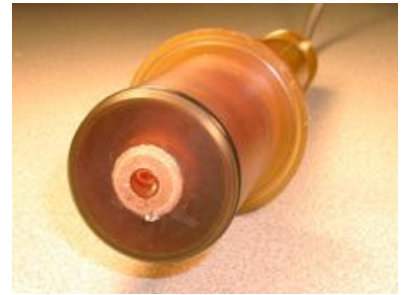

Convenient Twist Lock receptacles w mating sensors are perfect for high maintenance pH, ORP applications requiring frequent cleaning or calibration. Ideal for low-flow Ion Selective installations.

### Valve Retractable Sensors

Legacy 1" O.D. valve retractable sensors with blow-out protection for pH & ORP measurement.

### Sanitary pH/ORP Sensors

Solid state Sanitary Sensors are ideal for aggressive food and beverage processes requiring CIP cleaning. Our thick wall glass is nearly impervious to cracking, even under high temperature pressure conditions.

### Valve Retractable Assemblies

### Submersible Assemblies
